

Why Use Activate™ PMSLA? (Beneficial Microorganisms)

Activate™ PMSLA promotes:

- Free living nematodes
- Humus formation
- Active fungal length
- Active fungal biomass
- Predatory nematodes
- Total bacterial biomass
- Nitrogen fixing organisms

Why use our product?

- Guaranteed species analysis—unlike early generation bios or “bug-in-a-jug” products
- Naturally occurring organisms, not GMO
 - OMRI Listed for organic use
 - Suppression of fungal diseases
 - Suppression of nematodes
- Nutrient recycling and stubble digestion
 - Stimulation of root growth
 - Reduction in nitrogen use
- Symbiotic relationship with mycorrhizae and other beneficial fungal organisms

How to use Activate™ PMSLA: in soils, potting mixes, dry and liquid fertilizer blends, as a seed coating, as a transplant drench, in manure lagoons, as a pond water clarifier, as compost tea inoculant, through irrigation water, as a stubble digester, or as a compost starter
